HERO SECTION

THE BIG BUSINESS CO

From chaos to clarity.

We install the operating systems behind small businesses — so warehouses and trades run with control, safety, and visibility instead of stress and guesswork.

The Big Business Co (BBC) works in two lanes:

- Trade & service businesses
- Warehouses & physical operations

We don't sell software.

We don't give advice.

We design and install the systems that make businesses actually work.

[Book a walk-through]

—

WHAT WE DO

We help small businesses replace operational chaos with control by:

- Making it clear how work flows from start to finish
- Reducing safety risk and embedding proper WHS systems
- Fixing dispatch, delivery, and follow-through
- Giving owners real visibility over stock, tools, jobs, and cash
- Installing clear roles, standards, and “this is how we operate” systems
- Selecting and integrating proven tools into one way of working

The result is a business that runs smoothly, safely, and without relying on the owner to hold everything together.

—

OUR TWO LANES

TRADE & SERVICE BUSINESSES

We install business systems that fix:

- lost and unmanaged leads
- messy quoting and job flow
- slow or forgotten invoicing
- admin overload
- lack of financial visibility
- owner dependence

Typical outcomes: faster cashflow, less admin, clearer control, a business that can grow.

WAREHOUSES & PHYSICAL OPERATIONS

We install operating systems that fix:

- poor layout and stock flow
- dispatch delays and mistakes
- safety exposure
- lack of inventory visibility
- labour inefficiency
- person-dependent operations

Typical outcomes: safer sites, faster throughput, fewer errors, stronger operational control.

HOW IT WORKS

1. Walk-through
A short on-site discussion with the decision-maker to understand reality and confirm fit.
2. Diagnostic
A paid operational diagnostic that maps how the business truly runs and where it is breaking.
3. System design
BBC designs the operating system — flow, standards, controls, and components.
4. Install
We install the system into the business: processes, safety controls, visibility tools, and supporting software.
5. Handover & governance
You receive the blueprint, documentation, and controls to keep the system working — with optional ongoing support.

WHY BBC

Most providers sell tools or write reports.

BBC owns how your business operates.

We are accountable for how work flows, how safety is embedded, how dispatch runs, and how visibility is created.

Software, suppliers, and partners are components.
BBC owns the system.

CALL TO ACTION

If your business feels chaotic, unclear, or harder than it should be, the first step is a walk-through.

Luke will meet you on site, listen, assess fit, and explain the diagnostic process.

PAGE 2 — TRADES

TRADES & SERVICE BUSINESSES

Business systems installed. Not advice.

BBC installs the systems behind trade businesses so work flows, cash moves faster, and the business stops relying on the owner to hold everything together.

This is for plumbers, electricians, builders, HVAC, maintenance, and service-based businesses who want control and scalability.

—

COMMON PROBLEMS WE SEE

- leads falling through the cracks
- quoting and jobs managed in heads and text messages
- invoices delayed or forgotten
- poor cashflow visibility
- admin overload
- no consistent way the business runs

—

WHAT BBC INSTALLS

Every trade engagement is designed from a diagnostic, but systems commonly include:

- lead capture and enquiry flow
- quoting and job control systems
- automated invoicing and payments
- customer and job visibility dashboards
- admin-reduction automation
- business operating standards
- WHS and compliance foundations
- handover documentation

We design the system.

We select the components.

We install and embed it into daily work.

—

WHAT YOU END UP WITH

- a professional front end
- structured job flow
- faster invoicing and clearer cash visibility
- less admin load
- documented business systems
- a platform that can grow

The business moves from reactive to operating.

—

HOW TO START

The first step is not a build.

It is a diagnostic.

BBC maps how your business currently runs:

lead → quote → job → invoice → cash.

From that, you receive a clear fix plan.

PAGE 3 — WAREHOUSES

WAREHOUSES & PHYSICAL OPERATIONS

Operating systems installed. Not consultancy.

BBC installs the operating systems behind warehouses, workshops, and physical businesses.

We specialise in environments where safety, stock flow, labour, and dispatch must work together.

—

COMMON PROBLEMS WE SEE

- messy layouts and wasted movement
- stock errors and poor visibility
- dispatch delays
- safety exposure
- unclear roles and standards
- labour strain
- owner dependence

—

WHAT BBC INSTALLS

Every warehouse engagement is diagnostic-led, but systems commonly include:

- layout and stock flow design
- receiving, storage, picking, and dispatch standards
- inventory and asset visibility systems
- safety and WHS operating systems
- dispatch and freight discipline
- role clarity and handoff rules
- performance control rhythms
- documentation and handover packs

We do not leave reports.

We install operating systems.

—

WHAT YOU END UP WITH

- safer operations
 - faster throughput
 - clearer accountability
 - reduced errors and rework
 - operational visibility
 - a warehouse that runs on systems, not individuals
-

HOW TO START

The first step is a walk-through.

Luke attends site, reviews reality, and explains the diagnostic process.

OPTIONAL FOOTER (ALL PAGES)

The Big Business Co
From chaos to clarity.

Helping small businesses operate like big ones.

© The Big Business Co | Melbourne, Australia

1) SITE MAP (PHASE 1 — 3 PAGES)

PRIMARY NAV

- Home
- Trades
- Warehouses
- Book a Walk-through (button / anchor)

FOOTER

- About BBC (short section on Home)
 - Contact
 - Email link
 - Location (Melbourne, VIC)
-

2) PAGE-BY-PAGE UI STRUCTURE

HOME PAGE STRUCTURE

1. HERO
 - Business name
 - “From chaos to clarity”
 - 1–2 line value statement
 - Primary CTA: Book a walk-through

Goal: immediately explain what BBC is and who it's for.

2. WHAT WE DO
 - 5–6 dot points (plain-English)
 - No jargon
 - Pain → outcome framing

Goal: clarity + resonance.

3. OUR TWO LANES

- Split layout: Trades | Warehouses
- Short description each
- “Learn more” links

Goal: self-identification.

4. HOW IT WORKS

- 5-step process
- Visual flow or cards

Goal: de-risk engagement and explain paid diagnostic path.

5. WHY BBC

- System owner explanation
- Differentiation from consultants/software

Goal: authority + uniqueness.

6. CALL TO ACTION

- Walk-through framing
- Contact button
- Email

Goal: conversion.

7. FOOTER

- Tagline
 - Email
 - Location
 - Copyright
-

TRADES PAGE STRUCTURE

1. HERO

- “Trade & Service Businesses”
- 1–2 line outcome statement
- CTA button

2. COMMON PROBLEMS

- 5–6 bullet pains

3. WHAT BBC INSTALLS

- grouped sections
- systems, not tools

4. WHAT YOU END UP WITH

- outcome bullets

5. HOW TO START

- walk-through → diagnostic → install

6. CTA

WAREHOUSES PAGE STRUCTURE

1. HERO

- “Warehouses & Physical Operations”
- control / safety / throughput positioning
- CTA

2. COMMON PROBLEMS

3. WHAT BBC INSTALLS

4. WHAT YOU END UP WITH

5. HOW TO START

3) FUNCTIONAL UI REQUIREMENTS

- Mobile-first
 - Very fast load
 - Minimal animations
 - Strong whitespace
 - Authority tone
 - Business-like aesthetic
 - Simple booking/contact flow
 - Scalable structure
-

4) CONVERSION ELEMENTS

- Persistent “Book a walk-through” button
 - Email always visible
 - Simple form (name, business, phone, email, business type, size, challenge)
-

5) FUTURE-READY (NOT FOR BUILD NOW)

Structure should allow future pages:

- Case studies
- Partner ecosystem
- Software & systems
- Safety engine
- QR system
- Articles / insights
- Client portal

Site should be built to expand, not rebuilt.

1) PURPOSE

Build a professional, high-trust website for The Big Business Co that positions BBC as a serious operations and systems firm — not a consultant, agency, or software reseller.

The website must:

- clearly explain what BBC does
 - communicate authority and calm
 - separate the two service lanes
 - convert visitors into walk-throughs
 - scale into a software/systems platform later
-

2) BRAND POSITIONING

BBC installs operating systems behind small businesses.

This is infrastructure, not marketing.

The site should feel:

- controlled
- structured
- intelligent
- modern
- trustworthy
- operational

Avoid:

- startup hype
 - gimmicks
 - agency vibes
 - corporate fluff
 - loud colours
-

3) VISUAL DIRECTION

- neutral, strong colour palette
- warehouse / workshop / industrial cues
- simple modern typography
- high readability
- minimal but confident
- subtle motion only

Think: modern operations firm, not marketing agency.

4) USER EXPERIENCE GOALS

Visitors should quickly understand:

1. who BBC is for
2. what BBC actually does
3. how engagement works
4. how to start

The site should make it easy to:

- self-identify
- trust
- take the next step
